Reports & Features

Recce Survey
- High Resolution RGB Map
- Elevation Map
- Aspect Map
- Void Map

Plot Level Surveys
- Stems Per Hectare
- Crown Closure
- Tree Height
- Well Spaced Tree Count
- Species Detection

12 Hrs
Reporting

3-5x
Faster

200-300
Ha/Day

Manual forest surveys are:

1. Time consuming and labor intensive

2. Limited in daily coverage

3. Difficult to standardize across large forest blocks

4. Expensive

5. Have accessibility problems

As forestry operations scale, traditional methods struggle to deliver the **speed, accuracy, and repeatability** required for effective planning and regeneration monitoring.

THE SOLUTION

SylvaSense

SylvaSense enables forestry teams to **collect, analyze, and visualize forest data more efficiently and accurately.**
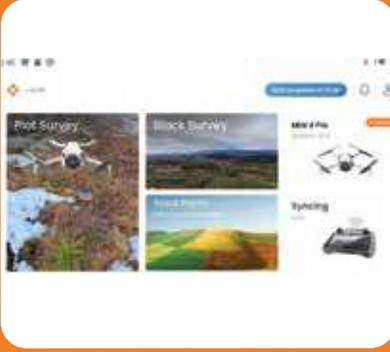

No Techincal Expertise Required

# HOW IT WORKS
